

A close-up photograph of a shower floor. A metal grate with a square pattern is partially visible on the left, set into a brown, textured surface. The floor is covered with a thick layer of white, bubbly foam, suggesting a shower in progress. The lighting is soft, highlighting the texture of the foam and the metal.

ACO A-Plus ShowerChannel

## ACO A-Plus ShowerChannel

### Features & Benefits

A-Plus linear shower channels available in three lengths: 27", 36" and 48".

Grade 304 stainless steel designer style grate options available in three standard lengths.

ABS plastic shower channel body with a shallow "V" profile to aid flow of water to outlet. Body fits above shower membranes.

Centrally located 2" ABS plastic spigot outlet. Threaded pipe connector included for connecting to plumbing pipe.

Easily cut, plastic, adjustable feet for install support.

Grate finishes include polished stainless, matte black, satin bronze or tile-in style.

# Square

# ACO A-Plus ShowerChannel

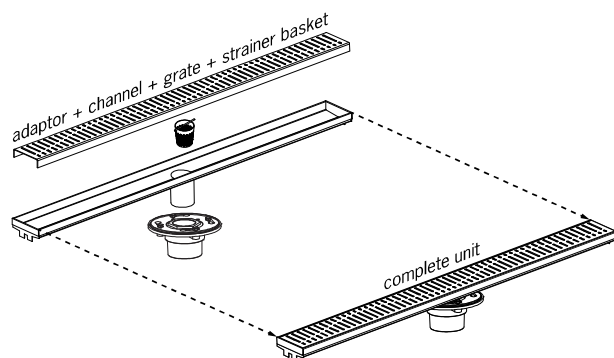

## Channel Options

### The Art of Integration

There are several install options available when building or renovating a bathroom. ACO ShowerDrain supplies you with channel builds to suit installations common to any other type of drain, including those requiring CPE, fabric, or hot mop and painted membranes.

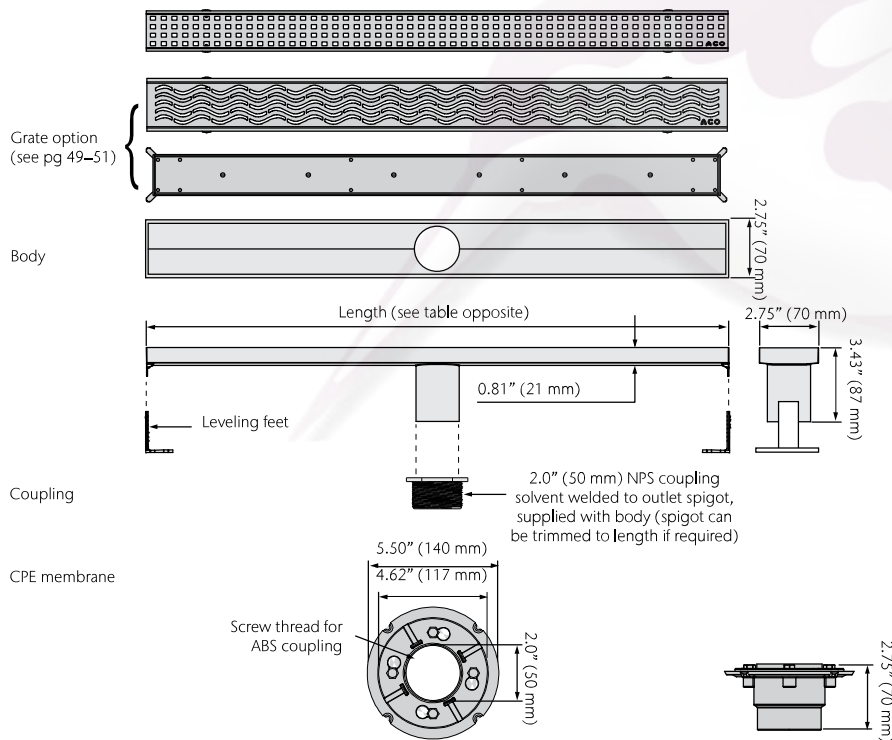

ACO A-Plus ShowerChannel is provided as a kit, which is blister packed together and includes the following components:

- Shower channel
- Grate option
- Strainer
- Drain flange coupling
- (2) leveling feet
- Grate lifting key
- Installation instructions

# ACO A-Plus ShowerChannel

Compression gasket available as a separate accessory (#93785)
